

Dermagique Corporal

REPARATIVE FACIAL MICROPEELING

Introduction

Skin science is getting widely extended every day –skin composition and treatments, how it works, what it needs, etc. Today we have all that information available to us.

Kuhra Vital is a line of products for the Aesthetic Medicine professionals and dermatologists, including the most advanced organic components from vegetal origin to fight diverse skin-related problems. Also included are oligoelements, vitamins, proteins and various active compositions, specially chosen for treating and repairing the skin.

The oligovitamin supplement plays a central role within the skin metabolism by contributing important co-factors for enzymatic and chemical reactions. Stress makes our skin look pale and tired! To fight such unhealthy effects, we need to get vitamins and minerals as well as the additional active ingredients Kuhra Vital has carefully selected for us. Each skin problem is different and each one needs a particular attention and effectiveness -hyperseborrhea, dryness, lines, wrinkles, irritation and hyperpigmentation.

Composition

Dermagique introduces a formula including two phases.

Dermagique Phase 1

Micro-peeling including vegetal-origin enzymes 10%, solar protector # 20 and Solar cleansing Klee 5%.

Dermagique Phase 2

Repairs and regenerates skin layers. Includes strong vegetal cells, vitamins A and C and soy oligoproteins. Additional essential nutrients combined in Juvaderm include placenta 5%, hyaluronic 5%, DNA 5%, COQ10 5% and vegetal-origin tensors. Dermagique includes solar protector (factor 20).

How it works

Dermagique Phase 1

A vegetal enzyme system that eliminates dead cells and clarifies skin complexion.

Dermagique combines two vegetal enzymes with desquamation and proteolytic properties in order "to digest" cell residues and remove dead cells from the surface. By increasing cellular renovation and restoring skin smoothness, Dermagique makes your skin look shining and healthy.

Dermagique Phase 2

A calming gel for your skin following an enzymatic exfoliation. By means of a moisturizing action, Dermagique inhibits the formation of free radicals within the epidermis. A reliable moisturizing gel, Dermagique remarkably reduces that redness caused by enzymes. Also includes Juvaderm, a composition made from different extracts, a special active ingredient for restoring the metabolism of the youngest skin cells through the superficial receptors of aging cells.

Indications

Dermagique Phase 1

Night use. Dermagique will flake the skin into fine, microscopic forms, while showing a deep cleaning effect of the dermal strata. Dermagique completely eliminates spots, acne and superficial expression corporal lines. Dermagique is the first and only product available for daily use –flaking process occurs in a soft, slow and non-irritating way.

Dermagique Phase 1

Day use. Includes nutrients, regenerator and reaffirming factors for a magical touch - bringing your fresh and young skin back. Kuhra Vital guarantees that components of Dermagique Phase 1 and Phase 2 are hypoallergenic, harmless and suitable to all types of skin.

Contraindications

Dermagique includes solar protector factor N° 20. However, we recommend using solar protection before exposing directly to sunlight.

Application

Dermagique Phase 1

For night use only. Aplicate it after clean the skin.

Dermagique Phase 2

For day use only. Aplicate it after clean the skin in the morning.

Recommendation

Consider using Dermagique separately every three months (four treatments a year). Use Dermagique following exfoliation treatments.

Packaging

Dermagique comes in one expanded polystyrene box designed for protecting the product

against temperature variations. This product comes in two dispenser-type bottles, 125 ml each. Dermagique is manufactured in sterile atmosphere under strict quality controls and several dermatological clinical tests according to the international regulations governing the matter.
