

Moskul

MUSCLE TENSOR – EXPANDER

Introduction

Muscles are bundles of cells and fibers that work in a very simple way. They make two kinds of movements - contraction and relaxation. We have two (2) sets of muscles associated to a number of bones, which makes us able to move. So far we know 630 active muscles, acting as part of a group and properly co-related. When our movements become less active and frequent, some kind of dystrophy and loss of muscular mass begins to appear, because of a number of reasons as years go by. Sedentary people are prone to suffer from muscular dystrophy and loss of muscle firmness and mass. Life-style, diet and lack of exercise are causing muscle loss to become common, especially in body areas such arms (biceps) thigh (crotch), gluteus and back muscles. To treat this problem, Dermabiol Institute of Kuhra Vital, where ongoing research and multiple tests, protocols and clinical tests are made, created Moskul. This is a product to fight the loss of firmness and mass of muscles and, at the same time, to activate blood circulation and stimulate muscle regeneration and oxygenation.

Composition

Each 125 ml of Moskul contains water, monomethyl trisilanol, manuronate, Humulus lupulus (hops extract), Tilia Cordata (linde tree oil), Zea Mays (Corn oil), poly-acrylamide, Panax ginseng, (Ginseng extract), Isoparaffin, Tymus serpyllium, Laureth 7, Lupinus Albus, phenoxyethanol, hydroxagenase, Mahuanga extract, Carnitinal, chromium picolinate, creatine.

Indications

Moskul is specially indicated for increasing the size of muscles and providing toughness, while activating oxygenation and reducing intercellular atrophy and muscular flaccidity. Moskul unblocks the production of those natural energetic activators that secrete substances that cause muscular tension and pain. Moskul will control and balance muscle toughness and growth. This product is specially indicated for any kind of muscular pains and sprains. Kuhra Vital guarantees that Moskul's components are harmless, hypoallergenic and can be used on every kind of skin.

How it works

Monomethyl trisilanol manuronate or organic silicon is great for strengthening and restructuring fibers at the conjunctive tissue level. Humulus lupulus: Includes lupuline and estrogen, all of them acting as cutaneous revitalizers and stimulators of strength. Tilia Cordata: A sacred tree from the ancient germanic civilization that provides essential oils such as pharnesols, tanines, sugars, mucilages and magnesium, Vitamins B and C and

works through astringent, softener and reaffirming properties. Panax ginseng is rich in polysaccharides and Vitamin B and is a great revitalizer. Tymus serpyllium provides two phenols, one of them called cavacol (a stimulant). Lupinus albus provides albumina, starch and aminoacids and its seeds rank among the richest ones in proteins (more than 40%) it works as a perfect nutrient for the skin.

Administration

Apply continuously with an energetic massage and see how Moskul increases and strengthens your muscles. Moskul is specially designed for gluteus, upper arm and thighs. People who exercise and weight-lift will be the first ones noticing how firmer and tougher the muscle tissue becomes. Administer where volume and strenght are needed. Work with an energetic massage (unless you are going to exercise, just wait until a complete absorption of the product).

We recommend using Moskul every other day for 1 month and see the results.

Contraindications

No adverse reactions observed.

Presentation and packing

Moskul comes in two (2) dropper-style bottles with 30 ml. each. This product is packed in an expanded polystyrene box that protects the contents against temperature variations. Moskul is manufactured under strict quality controls and several dermatological clinical tests according to the international regulations governing the matter.

Warning

Kuhra Vital guarantees the purity and quality of its products and shall not be responsible for harm caused to third parties due to bad praxis.
